Genesis 3:20 (7:23)

Gen 3:20 Now the man (Adam) called his wife's name Eve, because she was the mother of all the living.

7:23 Thus He blotted out every living thing that was upon the face of the land, from man to animals to creeping things and to birds of the sky, and they were blotted out from the earth; and only Noah was left, together with those that were with him in the ark.

창세기 (Genesis) 3:20 (7:23)

3:20 아담이 그의 아내의 이름을 하와라 불렀으니 그는 모든 산 자의 어머니가 됨이더라

7:23 지면의 모든 생물을 쓸어버리시니 곧 사람과 가축과 기는 것과 공중의 새까지라 이들은 땅에서 쓸어버림을 당하였으되 오직 노아와 그와 함께 방주에 있던 자들만 남았더라

CHAPTER 2

◀ Humans living 2 million years ago shaped stone and animal bones into simple tools.

Early Hominids

2.1 Introduction

In Chapter 1, you explored cave paintings made by prehistoric humans. Scientists call these prehistoric humans **hominids**. In this chapter, you will learn about five important groups of hominids.

You've already met three kinds of "history detectives"—archeologists, historians, and geographers. The study of hominids involves a fourth type, paleoanthropologists. Anthropologists study human development and culture. Paleoanthropologists specialize in studying the earliest hominids. (*Paleo* means "ancient.")

In 1974, an American paleoanthropologist, Donald Johanson, made an exciting discovery. He was searching for artifacts under a hot African sun when he found a partial skeleton. The bones included a piece of skull, a jawbone, a rib, and leg bones.

After careful study, Johanson decided the bones came from a female hominid who lived more than 3 million years ago. He nicknamed her "Lucy" while he was listening to the song "Lucy in the Sky with Diamonds," by the Beatles. She is one of the earliest hominids ever discovered.

What have scientists found out about Lucy and other hominids? How were these hominids like us? How were they different? What **capabilities**, or skills, did each group have? Let's find out.

The timeline shows the following hominid groups and their durations:

- Australopithecus afarensis**: 4 million years ago to approximately 3 million years ago.
- Homo habilis**: Approximately 2.5 million years ago to 1 million years ago.
- Homo erectus**: Approximately 1.8 million years ago to 300,000 years ago.
- Homo sapiens neanderthalensis**: Approximately 400,000 years ago to 40,000 years ago.
- Homo sapiens sapiens**: 40,000 years ago to the present.
- Modern humans**: The present.

Use this timeline as a graphic organizer to help you study five groups of hominids.

Human Origin from Genesis

Tower of Babel

“If we all descended from two people, Adam & Eve, where did all the races come from?”
