창조와 역사

(Creation & History)

(5/28-6/18)

June 11, 2023

이상민 목사 (Pastor Sangmin Lee)

실리콘밸리 미션교회
Silicon Valley Mission Church

창조와 역사

(Creation & History)

주제 (Topics):

1. 노아 홍수와 과학 (Noah's Flood & Science)
2. 창조와 과학 (Creation & Science)
3. 노아의 방주와 공룡 (Noah's Ark & Dinosaur)
4. 노아 홍수와 인디언 (Noah's Flood & Indian)

Genesis 6:17-20

17 I am going to bring floodwaters on the earth to destroy all life under the heavens, every creature that has the breath of life in it. Everything on earth will perish. 18 But I will establish my covenant with you, and you will enter the ark—you and your sons and your wife and your sons' wives with you. 20 Two of every kind of bird, of every kind of animal and of every kind of creature that moves along the ground will come to you to be kept alive.

창세기(Genesis) 6:17-20

17 내가 홍수를 땅에 일으켜 무릇 생명의 기운이
있는 모든 육체를 천하에서 멸절하리니
땅에있는 것들이 다 죽으리라 18 그러나 너와는
내가 내 언약을 세우리니 너는 네 아들과 네
아내와 네 며느리들과 함께 그 방주로 들어가고
20 새가 그 종류대로, 가축이 그 종류대로, 땅에
기는 모든 것이 그 종류대로 각기 둘씩 네게로
나아오리니 그 생명을 보존하게 하라.

Is Noah's Ark Real?

Then, There Must be Evidences...

Size and Shape of the Ark

What does it look like?

-Mike Riddle slide-

<https://www.quora.com/What-infrastructure-of-today-can-you-compare-the-size-of-Noahs-ark-to>

300 cubits x 50 cubits x 30 cubits
(450 ft x 75 ft x 45 ft= 140m x 23m x 14 m)

“Scientific Study Endorses Seaworthiness of Ark”

The proportions of the Ark were found to carefully balance the conflicting demands of stability, comfort, and strength.

<https://answersingenesis.org/noahs-ark/thinking-outside-the-box/>

“Noah’s Ark was the focus of a major 1993 scientific study at the world-class ship research center KRISO, based in South Korea. Dr. Hong’s team compared twelve hulls of different proportions to discover which design was most practical. No hull shape was found to significantly outperform the 4,300-year-old biblical design. In fact, the Ark’s careful balance is easily lost if the proportions are modified, rendering the vessel either unstable, prone to fracture, or dangerously uncomfortable.”

How Can All Get on the Ark?

Overall size: 140m x 23m x 14 m = 522 train container

240 sheep/container x 522 = 125,280 sheep/ total volume,

“Two of every kind of bird, ...animal ...creature that moves along the ground” (Gen.6:20) → Total species of animals ~ 17600 x (2 pair) ~

35,200 sheep → ~30% of total volume <http://www.creation.or.kr/library/print.asp?no=2542>

Dinosaur in the Human Record ?

...for out of the serpent's root shall come forth a cockatrice, and his fruit shall be **a fiery flying serpent**. (KJV) *Isaiah 14:29*

In that day the LORD with his sore and great and strong sword shall punish Leviathan the piercing serpent, ...and **he shall slay the dragon that is in the sea**. *Isaiah 27:1*

Can you draw out **Leviathan** with a fishhook... **Out of his mouth go burning torches**;...The sword that reaches him cannot avail; ... He regards iron as straw, Bronze as rotten wood... *Job 41:1-34*

The burden of the beasts of the south: into the land of trouble and anguish, from whence come the young and old lion, the viper and **fiery flying serpent**, ... (KJV) *Isaiah 30:6*

Dinosaur in the Human Record ?

Yes!!

Job 40:15-18

Behold now behemoth, which I made with thee; he eateth grass as an ox. . . .

He moveth his tail like a cedar . . .

His bones are as strong pieces of brass; his bones are like bars of iron.
He is the chief of the ways of God.

Dinosaur from Millions Years Ago ?

CALIFORNIA'S NESSIE

Pondering the possibility that pre-historic creatures survive in the Pacific

BY WILLIAM C. ROBERTS

For hundreds of years, sailors have reported seeing huge dragon-like creatures that have surfaced near—and sometimes attacked—unwary ships and crews plying the world's seas. From the far Arctic Ocean to the deep, land locked Loch Ness, the large snake-like beasts that swim with their heads held high above the water blowing clouds of spray from their mouths terrified sailors who called them "sea serpents." Do they really exist or are they figments of the imagination of uneducated seafarers who spend too much time near the rum cask?

The ocean is the world's last great frontier and many areas of this vast body of water remain unexplored to this day.

the age of the dinosaurs and occasionally are seen by humans.

Off the coast of Central California lies a mysterious underwater trench that extends many miles into the Pacific. Known as the Monterey Submarine Canyon, it is one of the deepest and least studied chasms in the sea.

For more than 100 years, sailors and fishermen in the vicinity have reported sightings of unusual marine animals, huge fish of strange descriptions, mysterious forms swimming beneath the waves and freak water conditions and currents that spring up for no apparent reason. Parts of the submarine canyon have even been described as having bottomless pits

Spectators came from miles around to view the "sea monster" that washed up on Moore's Beach near Santa Cruz in 1935.

shore, without striking bottom. To add to the mysterious appearance

"My examination of the monster was quite thorough It had no teeth. Its head is large and its neck fully 20 feet long. The body is weak and the tail is only three feet in length from the end of the backbone . . . with a bill like it possesses, it must have lived on herbage and undoubtedly inhabited a swamp. I would call it a type of plesiosaurus."

Another witness, Judge W.R. Springer of Santa Cruz, felt the creature was from a prehistoric age. He added his observation: "evidence of two short feet or flippers, and probably swam with its head high above the water."

Dinosaur from Millions Years Ago ?

“The research, by Mary Schweitzer, a molecular paleontologist at North Carolina State University, explains how proteins — and possibly even DNA — can survive millennia. She and her colleagues raised this question in 2005, when they found the soft tissue preserved inside the leg of an adolescent T. rex unearthed in Montana.”

“This fragment of demineralized tissue lined the marrow cavity of a T. rex femur. The demineralized fragment in “A” was flexible and resilient. When stretched, as shown by the arrow, it returned to its original shape. “B” shows the same fragment after air-drying. The fibrous character of the fragment is shown in “C.””
